

Press Corporation Limited has an HIV/AIDS Policy whose core objective is to promote the Company's responsibility for providing a healthy and equitable work environment for all employees, including those with HIV/AIDS.

Members of staff at the Press Corporation Limited clinic have been trained to provide the appropriate counselling to employees who are diagnosed HIV positive. The clinic is fully equipped to provide free anti-retroviral therapy to employees of the Group, and on payment of a nominal fee, to the general public. This latter service to members of the general public is provided primarily as one way of fulfilling some of its social responsibilities.
